Zebra Healthcare Scanners

Healthcare workers have enough to worry about—like delivering critical care to patients. That's why Zebra healthcare barcode scanners are designed to operate all shift long, work quietly through the night, and withstand anti-bacterial cleaning. They become the easiest part of the job.

Zebra Healthcare Printers

All of Zebra's healthcare printers include the exclusive Print DNA software suite that makes them simple to set up, manage and secure – onsite or remotely. Engineered for evolving technology means years of operation. Zebra's printers give you peace-of-mind security with PrintSecure, part of Print DNA, to prevent downtime and costly cyberattacks. Choose from direct thermal, thermal transfer, and RFID models.

21.5" Medical Panel PC

CA-ME215P 21.5" Panel PC uses capacitive (PCAP) technology for smooth touch operation with support up to 10 points of multi-touch. The display has excellent scratch resistance and screen transparency. Fan-less design reduces maintenance and eliminates concern about dust or other air-borne contamination. Equipped with a "Power failure protection system" function, this protects data and prohibits writing to storage in the event of power failure.

HID OMNIKEY® 5427CK
LF/HF RFID ID Badge Reader

With the keyboard wedge functionality, the 5427CK can retrieve data from an ID card that is presented to the reader and directly input the card data into an application using keystroke emulation. This eliminates the need for users to manually enter the card data into an application.

A Cart Designed for the Intense Medical Environment
Configured to Your Specific Needs

Need to discuss with First Products key features and selling points on the cart and include information here

Other available options include: Powered Connectivity for Device Charging, Inductive Charging, Batteries, RFID Location and Tracking, Work Surface and Drawer Size Options, USB Data Port, Cable Management Systems and More.
