

## At Dolphin Data Capture we focus on Machine Vision for Healthcare Applications.

From point-of-care and patient 5 rights to Pharmaceutical Manufacturing to Life Sciences and IVD Technologies

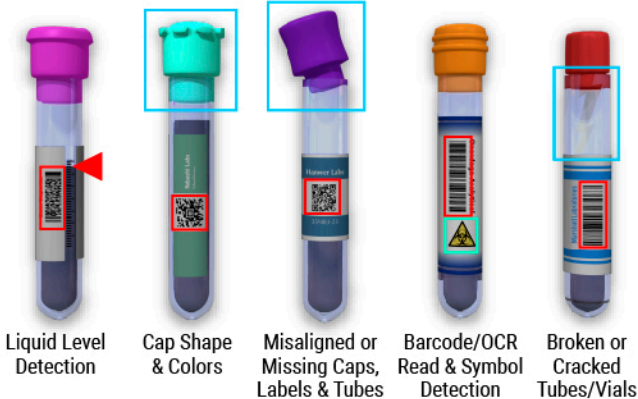

CPU with Adaptive Vision Machine Vision Software

Zebra Imagers  
(Or almost any other camera on the market)

- Identify
- Measure
- Match
- Analyze
- Read
- Control

### In Vetro Diagnostics (IVD)

Adaptive Vision machine vision from Zebra focuses on the most important details while bypassing distractions, which allows for the capture and assessment of essential information. This results in the most efficient and accurate data processing

# We Teach Machines to See, Collect and Deliver Data...

## Machine Vision & Deep Learning

# There are hundreds of potential Machine Vision & Deep Learning applications within healthcare...

Here are just a few examples where Machine Vision is having a huge impact today

## In-Vitro Diagnostics

- Lab Process Automation
- Vial/Test Tube/Slide Integrity & Identification

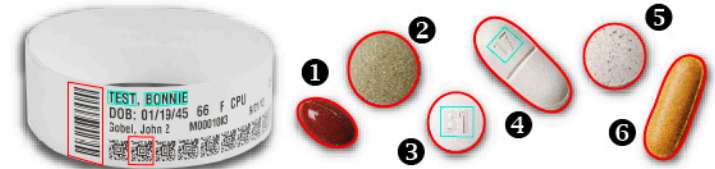

## Pharmaceutical Manufacturing

- Product Quality Control
- Packaging Quality Control
- Anti-Counterfeiting/Anti-Tampering
- Product Traceability

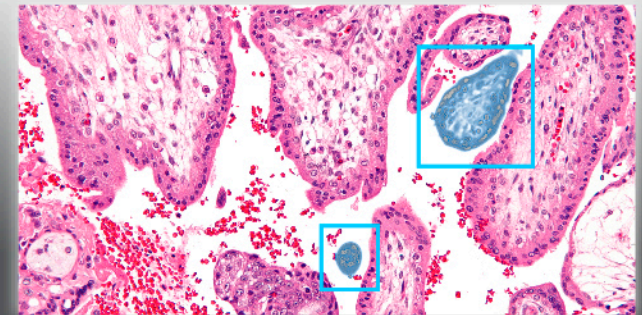

## Point-of-Care/Patient 5 Rights

- Patient Identity Management
- Medication Identification & Dispensing

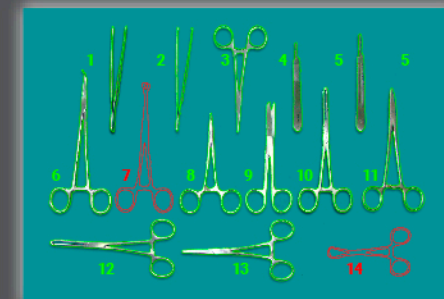

## Life Sciences

- Lab Process Automation
- Microscopy/Specimen Processing
- Medical Imaging

## Surgical Instrument Inventory and Tracking

- 2D Barcode Direct Part Marking
- Instrument Type Identification / Instrument Count
